

## **MOBION – Our Differentiator**

Mobion has been formed to address a need. “*The need being for people to be connected anywhere, anytime*”.

The vision for Mobion was to create a mobility company with a heavy focus on customer service and support. Here at Mobion we see ourselves playing the role of “Integrators”. Hardware, software and networks combined to provide for a seamless computing experience – now wirelessly.

Mobion believes that it is able to provide products and services that enable TRUE convergence of audio, video and computing in a wireless fashion whether in the home, the office or anywhere where one has an internet connection. Mobion can provide the services and support to make this new phenomenon a reality.

## **SERVICES PROVIDED**

### **Wireless networking**

At Mobion we specialize in the installation, configuration, service and support of wireless infrastructures. Whether a simple wireless network in the home or a converged audio, video, computing, security and home automation solution, Mobion can cater for your needs. We offer 24 hour access to our consultants, if required via web logging and help desk support.

### **Hotspot solutions**

Our MobiSpot hotspot solution allows one to take advantage of wireless internet technology and to generate income streams from this service. The solutions range from simple access to full access with automated billing capabilities.

### **MiniCube PC's**

This small form factor computer provides the ultimate in flexibility, versatility and style in one-third the space of a large, loud and somewhat cumbersome PC. All our MiniCubes come standard with an LCD monitor and a wireless keyboard and mouse. All you need to do is plug it in and the rest is seamless.

### **Mobile technology**

We work with the latest in mobile hardware and technology. Tablet PCs, GPS, Bluetooth, Wi-Fi, PDAs and much more. Mobion understands the different mobile technologies available. Mobion is able to provide solutions from leading global brands, fully supported and fully maintained. We have a number of customizable software applications ranging from mobile sales force automation to mobile stock management systems.

### **Automation**

Consider your TV, Hi-Fi, Internet, phone system, home automation and security system all communicating and networked wirelessly. Ever wondered how great it would be? Systems and services in the home and small business are growing exponentially and are becoming increasingly interconnected.
